Confirm the above amounts are correct. If you are willing to accept this, please make a public DAO proposal with these terms that includes those public addresses and announce it on twitter. I will immediately send back the assets other than USDC, MSOL, MNGO, and SOL as a show of good faith, and will send the remaining assets once the vote is complete and passes. This is to ensure the majority of stakeholders are actually on board.

We would like to wrap up this proposal so we can make depositors whole, avoid litigation and everyone can move on. You can send funds into these addresses:

Solana: 9mM6NfXauEFviFY1S1thbo7HXYNiSWSvwZEhguJw26wYETH: 0xa8e8729A6AAb10178FBac1E9D55A0c536ce3DCa8

Asset	Amount	Dollar Value
SOL	761,577.91	\$23,517,526
mSOL	799,155	\$26,531,946
BNB	608	\$165,206
GMT	152,843	\$97,178
AVAX	1,809	\$28,799
RAY	98,295	\$50,455
SRM	2,354,260	\$1,741,682
FTT	11,774	\$273,863
ETH	226	\$289,721
ВТС	281.498	\$5,363,667
MNGO	32,409,565	\$795,655
USD	10,000,000	\$10,000,000

GOVERNMENT
EXHIBIT
912
23 Cr. 10 (AS)

	Total	\$68,855,698

The DAO treasury will then be used to cover the remaining 39,406,240 USDC of the total 108,261,938 USDC of bad debt. This will leave the treasury with 25,773,666 USDC.

In return we agree not to pursue claims in the legal system against you.

Does all of this sound accurate to you?

I will add in the remaining tokens still held on Sol, and send 10M USDC on top of that. That leaves you with a healthy 30M treasury and achieves our shared goals of making all users whole, with any profits paid out of the insurance fund as per the protocol design. This offer is only valid today. I believe all my trades were legal and would be willing to defend that in litigation, but I'm sure neither of us want this to end in litigation dragging out over years with uncertain outcomes when we could resolve it cooperatively in under a week.

Hey, I don't know if I can get the votes for your offer. I *can* get the votes for this offer though:

- You get back the equity you deposited plus an additional 10m in USDC from DAO treasury
- 2. We won't press charges
- 3. You return all the funds exploited including BTC, ETH, USDC, SOL, MSOL, MNGO etc

How does this sound?
